

The collapse in its own scales
(a one-scale collapse is a straight line; open circles are the common restart)

- 513 x 2048 (16 points)
- 1025 x 2048 (radially refined) (2 points)
- 257 x 1024 (coarse twin) (208 points)

The stability landscape, $m = 1$ random seed
(grey plane is the threshold $1/2$; red points are the crossings)
